

doomswell

SIZES: 4'2—4'4—4'6'—4'8

CONSTRUCTIONS: STANDARD FIBERGLASS, BAMBOO & KEVLAR

Weight Ranges: 150-230 lbs depending on length of board

The Doomswell **NEO** is the one! With a complete single concave bottom contour bolstering speed and its rounder surf-style rails this high performance board will provide a ton of drive, airs' and spins to bring your surfing game to the top of its limits. The **NEO** keeps a crisp edge slightly tucked under the board to create a crisp release when you want it.

The **NEO's** increased volume "blunt" nose was designed to help aggressive surfers land in reverse much easier than a traditional pointed nose board. This board comes equipped with a quad fin setup for maximum control with the option to surf just the front fins for more of a loose, agile ride. The PX4 front fins and the RT-1 rear fins are included with every board. This board truly is "The One!" Choose from a variety of constructions that best suits your needs.

NUBSTEP

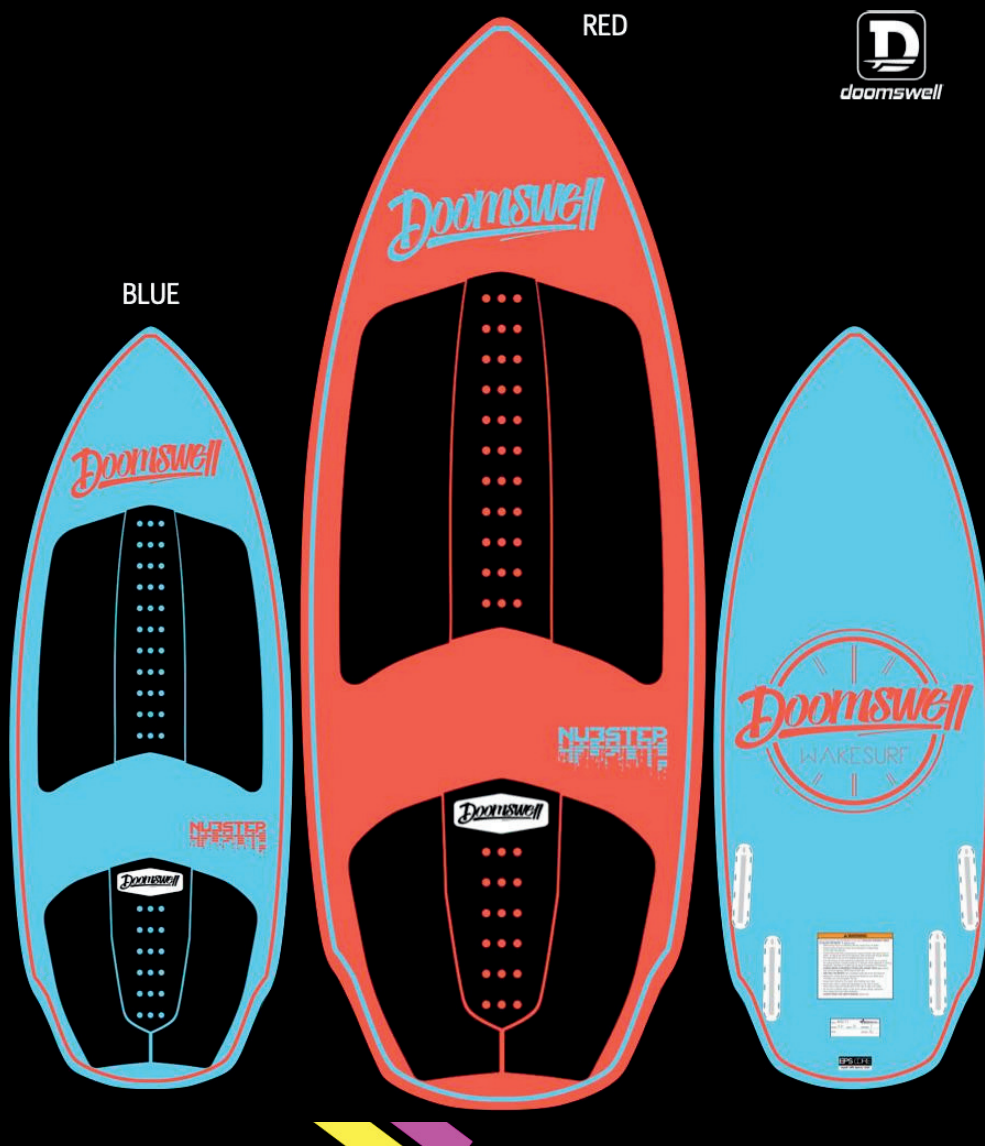

SIZES: 4'2 — 4'4 — 4'6' — 4'8

CONSTRUCTIONS: STANDARD

FIBERGLASS, BAMBOO & KEVLAR

Weight Ranges: 150-230 lbs depending on length of board

The Doomswell *Nubstep* was made with the high-performance surfer in mind designed with more surf style features than in years past. The pulled-back wing and rounded diamond tail offer a tight turning radius allowing riders to maintain control and boost command. With a single bottom concave for speed, an increased nose rocker, and slightly rounder rails for more drive, this board offers a crisp edge tucked under the base for release and planing. The *Nubstep* is truly the most agile design created by Doomswell.

SHUV

SIZES: 4'0—4'5—4'7

CONSTRUCTIONS: FIBERGLASS, UNIQUE

RIGID DECK INLAY & KEVLAR RAILS

Weight Ranges: 200-260 lbs depending on length of board

The all NEW Doomswell SHUV was designed for all you die-hard skim fans! We are excited to show you the Doomswell SHUV! With our unique structural design features such as a new sub layer inlay below the fiberglass, the board offers a rock solid deck that's as strong as a 75 year marriage. We wrapped the rails in Kevlar to offer impact resistance and even more stiffness and structure under your feet. The top side of the board is covered in a slotted EVA traction pad from nose to tail which allows traction no matter where you are on the board. On the underside of the board we provide a single fin slot for any futures style rear fin. The SHUV will come with a single RT-1 fin and we are also developing a new skim fin so stay tuned in 2024.

BUT WHAT ABOUT THE PERFORMANCE? We are so glad you asked! We have tested this board with some top athletes in the industry with a resounding "Holy Cow! This thing rips!" It's nimble and skips across the water like a rock you skipped as a kid!

F SERIES

SIZES: F45 — F47 — F410

CONSTRUCTIONS: STANDARD FIBERGLASS

Weight Ranges: 215-320 lbs depending on length of board

The all new F Series was designed to get heavier riders on to a smaller surf style board. We took the Falcon outline and added a blunt nose to maximize surface area and to help aid in keeping that nose out of the water. We added volume in key areas around the board to make sure there is no lag in performance. We added a single concave bottom contour from nose to tail to create lift and speed.

The rails of the F Series boards are very crisp, which offers control, speed, and the ability to stay on plane under heavier loads. We offer a twin fin setup on the F Series boards. This board will have lots of drive, recoverability, and will spin very easily. Because of the shape and wide surface area, this board will be able to handle riders From 215 to 320 lbs.

BAMBOO

Why choose Bamboo? Bamboo is a very strong material which is good for rigidity and impact resistance. In order to keep the boards from becoming too heavy, we use a vacuum bagging process which infuses the bamboo with epoxy resin. Once the bamboo is infused with the epoxy, the excess Resin is removed from the vacuum leaving a very light And tight bond making bamboo a very strong option. On top of all that, it boasts a very classy look in your board rack.

KEVLAR

We all know Kevlar is used in bullet proof vests and to answer your question...Yes, we use the same Kevlar you are thinking of. We use Kevlar to create VERY strong rails on select models. We have all been on the boat and have seen the devastating effects of the board getting out from under your feet. BAM. Your board goes straight into the back of the boat and you have damaged your board. That's where Kevlar can save you some headache and give you some peace of mind.

ENTRY LEVEL LINEUP

KIDS

THE HELIO IS THE SMALLEST PARTICLE IN OUR ELEMENT SERIES. WITH ITS LOW VOLUME AND STURDY BASE, GROMS WILL SURELY BE UP AND RIPPING IN NO TIME! THE 3 FIN OPTION ALLOWS FOR A STEADY AND STURDY FEEL FOR THE NEW RIDERS, GIVING THEM THE CONFIDENCE THEY NEED TO START THEIR NEW SURFING JOURNEY. THE DOOMSWELL HELIO IS A MUST-HAVE FOR THE NEWEST RIPPER LOOKING TO BEGIN THEIR SURFING ENDEAVOR. COMPRESSION-MOLDED CONSTRUCTION THREE SCREW-IN FINN ARE INCLUDED.

Up to 150 lbs

Size- 4'8"

Up to 220 lbs

THE DOOMSWELL HYDRO IS OUR LIGHTEST ENTRY-LEVEL BOARD. LOW BOARD VOLUME ALLOWS FOR EASY USE ON STARTS AND HELPS THE SURFER POP UP QUICKLY. A THIN ROCKER PROFILE AND CRISP RAILS ALLOW FOR EXCELLENT PLANING ABILITY AND MAINTENANCE OF SPEED AND CONTROL. INCLUDE THE THREE FIN OPTION AND THE HYDRO BOASTS DRIVE AND STABILITY, HELPING THE SURFER TO PERFORM AT THEIR HIGHEST LEVEL!

LITHIUM

LITHIUM IS ONE OF THE SIMPLEST ELEMENTS ON EARTH. THE DOOMSWELL LITHIUM IS PERFECT FOR THE NEW SURFERS ON YOUR BOAT. ITS THIN PROFILE MAKES GETTING UP A BREEZE! ONCE UP, LITHIUM'S LARGER SURFACE AREA OFFERS STABILITY AS NEW SURFERS GET THEIR SEA LEGS AND COMES WITH A TRI-FIN SETUP FOR MAXIMUM CONTROL. IF YOU'RE LOOKING FOR AN EASY, STABLE, AND COMFORTABLE RIDE, THE DOOMSWELL LITHIUM IS YOUR BOARD.

Size: 4'6"

Up to 215 lbs

NITRO

Doomswell Nitro is an entry-level skim in the Doomswell line. It sports a low rocker profile for speed and sharp skim-style rails for maximum looseness and spins. The rounded squash tail allows for sharp turns and maximum release off the lip, while the single fin aids in superior control when getting back into the wave after spin tricks.

The Nitro is a great option to learn how to skim without breaking the bank.

ACCESSORIES

SURF ROPE

9" Handle + Knotted Surf Rope has everything you look for in a surf rope – durable line, foam floats for easy recovery, padded grip, multiple boat-end length adjusters. 23' Total length.

BOARD BAG

Protect your board with a UV, heat, water, and mildew resistant board bag. With a back zipper, foam padding, and an interior pocket for small gear, it also boasts a removable shoulder strap to make carrying your wakesurf board a breeze. Available in 4'10" and 5'6" lengths.

PX-4 FIN

The PX-4 is a Wakesurf-specific fin set, with a moderate base width. These speed generating fins have more vertical rake and boast drive and the ability to break free, making them much more effective than other fins on the market. Try the PX-4 for speed, spins, and looseness, all combined into one.

30L DRY BAG

Keep your clothes, towels, and electronics dry with our Doomswell dry bag! The Doomswell Dry Bag is made from 500D PVC, making it highly durable and seals out the elements with watertight, welded seams and a roll-down top. Mesh side pockets provide extra room for non-dry storage, water bottles, and accessories. The waterproof front zipper pocket keeps small essential items such as keys and cell phones easily accessible. Lightweight, with two adjustable reinforced straps, it is also packable making it convenient to carry in any sized luggage.

Doomsweil

NEWLY REDESIGNED X4 HIGH PERFORMANCE FIN

MOST "SURF STYLE" FINS ON THE MARKET ARE GEARED TOWARD OCEAN SURFING WITH TOO MUCH RAKE. THE X4 HIGH-PERFORMANCE FIN SET WAS DESIGNED BY DOOMSWELL SPECIFICALLY FOR WAKESURFING. A MORE VERTICAL RAKE HELPS WITH PIVOTS AND A MODERATE BASE GIVES A LOT OF DRIVE OUT OF TURNS, WHILE A SLIGHT FOIL ON THE INSIDE OF THE FIN AIDS IN SPEED GENERATION. WE REDESIGNED THE BASE OF THE FIN WITH MORE REINFORCEMENT TO HANDLE MORE TORQUE. DON'T SLEEP ON THIS FIN.
